## LG NeON<sup>®</sup> R – PERFORMANCE & DESIGN WITH PASSION

The LG NeON<sup>®</sup> R is the new high-performance solar module from LG. Its aesthetic design and outstanding performance of up to 365 Wp is a valuable addition to any roof. The 60 cell solar module can endure a static front load up to 6,000Pa, has an expanded product warranty of 25 years and a once-again improved linear performance warranty.

### LOCAL GUARANTOR, GLOBAL SECURITY

LG Solar is part of LG Electronics, a global and financially strong company, with over 50 years of experience.

**Good to know:** LG Electronics is the warrantor for your solar modules.

The warrantor's 2015 sales in billions of euros

### EXCELLENT QUALITY, INDEPENDENTLY TESTED

You can rely on LG. We test our products with double the intensity specified in the IEC standard. This quality is valued by installers across Europe, which is why they have awarded our LG solar modules the Top Brand PV stamp of quality for the highest recommendation rates for the fourth time in a row.

### STRONG DESIGN, POWERFUL PERFORMANCE

The busbars on the new LG NeON<sup>®</sup> R were mounted on the rear of the cells to expose the entire front side to light and therefore generate more electricity. LG creates an innovative and aesthetic cell design by incorporating 30 rear-side busbars instead of the 3 or 4 standard busbars on the cell front, a revolutionary approach that guarantees outstanding module performance.

### POWERFUL DESIGN, GUARANTEED ROBUST

With reinforced frame design, LG NeON<sup>®</sup> R can endure a front load up to 6,000Pa (represents snow height of normal snow of more than 1.8 meters) and a rear load up to 5,400Pa (represents wind speed of up to 93 m/s, compare max. wind speed of Hurricane Katrina 2005 of max. 75 m/s).
